Wireframe Samples

The UX team currently uses MS Visio to create wireframes. Below are recent examples that I have created. Wireframes are typically paired with use cases created by the Business Analyst team and are presented, discussed and approved as a complete set of deliverables. The process for creating wireframes is transparent and collaborative. Business and technology partners are brought in to review and provide feedback on the wireframes as often as possible.

Common Tasks

- ▶App On-Line: Connected
- ▶Order Marketing Material
- ▶Search for forms
- ▶Check status of sent faxes
- ▶Learn more about products
- ▶Locate Regional Support

Notes

The Business Opportunities section will be displayed as a grid. Clicking on a business opportunity type will display the appropriate summary page.

Selecting 'my profile' will display the 'My Profile' page.

Selecting the 'Alerting Preferences' link below the Alert and Notifications section will display the 'My Profile' page opened to the 'Alerting Preferences' tab.

An indicator will be displayed on each pending policy that requires Agent action.

Selecting a link under the monthly release announcement will open the specific announcement content

3b. Internal system – modular wireframe describing the interaction options

Interaction Notes

Selecting and adjusting any of the sliders recalculates appropriate data and the Phase displays accordingly.

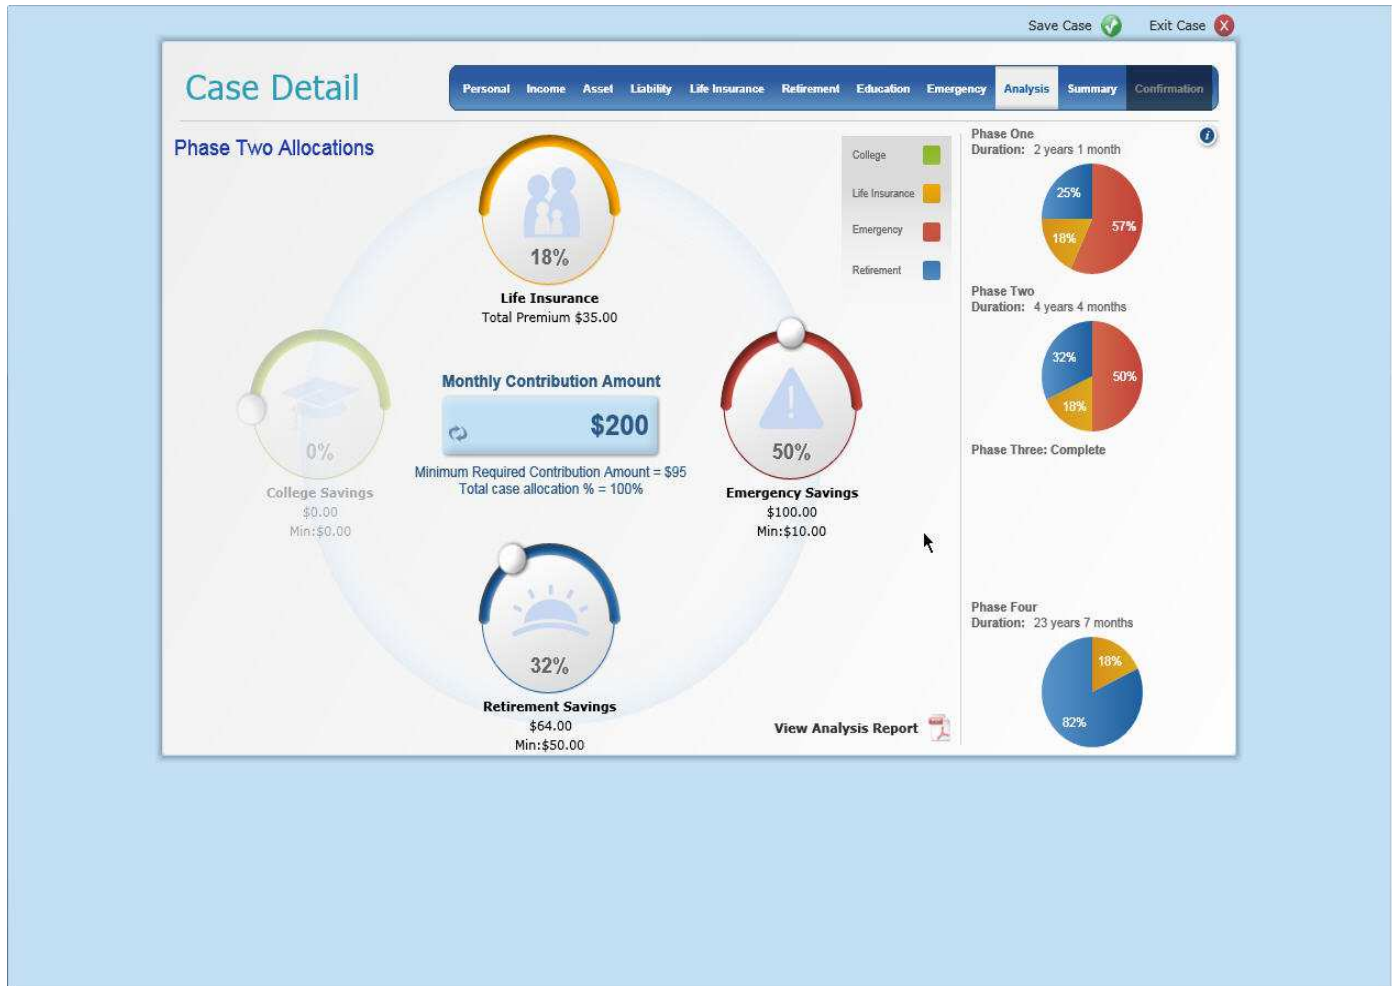

Clicking on the Life insurance icon displays the Life Insurance Details window. (see Life Details wireframe)

Clicking any other product icons displays the appropriate goals (see Goal Info Display wireframe)

Clicking on any piece of a phase section displays the Phase Details (see Phase Detail Display)

There is a refresh button that will recalculate the analysis manually in addition to the auto recalculation. Please see the SilverLight production code for the button design. The button will not have text.

Contextual Design Methodology Samples

Our design process is rooted in the Contextual Design Methodology created by InContext. Below are pictures of a highly creative, highly collaborative project that I worked on as the lead User Experience Architect.

Consolidated Vision

Affinity Wall

Esurance Design Concept

With the purchase of Esurance, Allstate Financial is looking to understand where life insurance may be included into the existing flow. Below are the wireframes I created visually demonstrating this possible design concept.

https://sales.esurance.com/CustomerFlow/CustomerFlowStandard/BundleDiscounts.aspx

cars drivers your quote additional info payment print id card
compare rates in minutes

Speak to an agent
1-800-580-7750
Or we'll call you >

primary driver information - continued

Street address:

City:
State:
Zip:
Primary residence
Phone number (optional)
Social security number
Do any drivers in your household have a PayPal account?
Education (highest level completed)

For an auto quote the system would add the life insurance info to the page.
When the check box is selected the life fields are active/ displayed.

Discounts

Claim-Free: None of the drivers in your household have had an accident or filed a claim (excluding comprehensive claims of up to \$1,000) in the last 5 years, and at least one driver has 5 or more years of driving experience.

Life Insurance Option

Did you know that a term life insurance policy could cost as little as \$11.45 per month? By answering a few simple health questions we can give you a quote for a 10 year term life policy.

I would like to receive a life quote

Are you currently using or have you ever used tobacco products?

Are there additional drivers in your household? Yes No

continue

https://sales.esurance.com/CustomerFlow/CustomerFlowStandard/BundleDiscounts.aspx

your monthly esurance quote

for auto and life

- Auto - '09 Honda Civic LX **\$90.23**
 - Life - \$100K 10yr Term **\$24.17**
- [discounts](#) **-\$42.84**

\$71.46

(\$420.00 for 6 months)

[payment info](#)

your discounts

Bundle discount	-\$16.35
Claim-Free	-\$5.50
Multi-car	-\$5.00
PayPal (10% discount)	-\$5.00
Fast 5	-\$2.33
Switch & Save	-\$2.33

Total Discounts **-\$42.84**

The life quote info would be displayed along with the auto info.

The bundled discounts (if applicable) would be displayed with all the other discounts.

The user would be given the option to choose which of the application to proceed with.

Assumption is that the auto application would start first and then go directly into the life application.
